

THIOL BOOST™

Thiol Boost is made from pure plant-based precursors. It amplifies guava, passionfruit, and grapefruit flavors to a level that can only be described as a revelation. Our Tropics strains biotransform the precursors in Thiol Boost into thiols, the highly desirable molecules that are abundant in tropical fruits as well as southern hemisphere hops. This pure, clear liquid was developed with exacting scientific rigor and is formulated for simplicity of use.

With Thiol Boost, brewers can easily and consistently tune the intensity of tropical flavors while using a single yeast strain. Use half the dose for a small boost or the full dose to attain tropical fruit nirvana.

Benefits:

Amplifies notes of guava, passionfruit, and grapefruit

Required strains:

Chill Tropics
Hornindal Tropics
London Tropics
Vermont Tropics

Recommended dosage:

200 – 400 mL per 1 BBL of wort

Product usage:

Add to the fermentor after knockout, within 12 hours of pitching yeast.

Storage:

Keep refrigerated, store at 4°C (39°F)

Product appearance:

May be clear, cloudy, or have a yellow tint

Format:

Available in 2 L and 18 L bottles

Safety:

Hazardous to consume or inhale prior to dilution. See SDS for additional information.

Performance data:

Figure 1: Thiol (3MH) concentration in three commercially available beers. Beers were fermented with unmodified London ale yeast (dry hopped), London Tropics, and London Tropics (400 mL/BBL Thiol Boost).
